

OceanaGold UPDATE

26 September 2024

CREST RAISE AT TAILINGS STORAGE FACILITY 1A

In mid-October, work will commence on a crest raise for Tailings Storage Facility 1A, increasing the height by 0.8 meters (800 mm) to provide additional tailings capacity for our mining operations. As with previous projects, this work is weather dependent and is expected to continue through to the end of April 2025.

This process involves stripping back the topsoil on the uppermost batter and layering new material over the compacted layer beneath. The work will progress in stages, with rehabilitation occurring as each section is completed.

Earthworks will be involved, so machinery may be visible on the facility's upper levels. To minimise the impact on the surrounding community, a range of measures will be in place to manage noise and dust in line with our consent conditions and relevant New Zealand standards. As part of our consent conditions, noise and dust monitoring and the recording of representative samples will be completed to ensure compliance.

Find out more about how we manage noise and air quality at:
www.waihigold.co.nz

HOURS OF OPERATION

Between 7.00 am & 7.00 pm weekdays
Between 7.00 am & midday on Saturdays

There will be no work carried out on Sundays or public holidays.

INVESTING IN OUR HOST COMMUNITY

SPONSORSHIP APPLICATION FORM
